JAVIER MARISCAL

Born in Valencia in 1950, Javier Mariscal considers himself foremost a maker of images. A noted graphic and product designer, he has art directed campaigns and retail installations for the likes of H&M and Camper. Having developed a personal language at once innocent and provocative which imbues all of his designs, he continues to innovate across genres, and in 2010 he co-directed the Oscar-nominated animated feature "Chico & Rita."

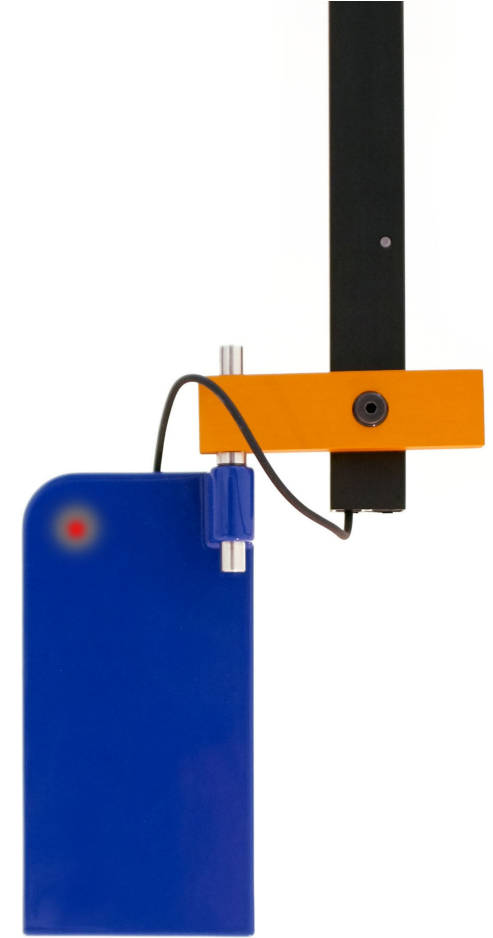

TECHNOLOGY

Minimal in terms of materials used and highly sophisticated in its mechanical structure, Lotek features an adjustable diffuser for direct high-performance LED lighting and an interactive infrared touch dimmer on its head.

MOBILITY

Lotek's articulated aluminum arm features an innovative ball and socket joint, allowing it to move vertically at 180°. Lotek's body rotates in a vast array of angles, supporting any activity with its highly interactive, targeted lighting suitable for any need.

LIFESTYLE

Designed by graphic designer Javier Mariscal, Lotek is defined by its interactivity. It suits any daily lighting need, and accommodates to any active lifestyle with its technical innovation and colorful shape.
